

Lector65x System

Your objects are always in focus

TRACK AND TRACE SYSTEMS

SICK
Sensor Intelligence.

Technical data overview

Transport speed	0 m/s ... 3 m/s (depending on application)
Minimum object distance	≥ 50 mm

Product description

The track and trace system based on the Lector65x matrix camera reliably identifies and decodes all common types of codes. With up to a 4 megapixel CMOS sensor, the Lector65x has the resolution to read all object sizes from large to small. Thanks to the dynamic focus, unique for matrix cameras in world, and the dynamic brightness adjustment, the Lector65x System produces highest quality images. These images could even be used for other vision related tasks. With an integrated tracking function, object gaps can be reduced, increasing the overall throughput on the conveyor or sorting system. Building on the MSC800 networking concept, the Lector65x System can easily be combined with other products, such as ICR8xx line-scanning cameras, volume measurement systems, laser-based code readers, or weigh scales. This allows the best possible solution to be generated for each challenge.

At a glance

- Dynamic focus adjustment
- Big depth of field in fix focus operation
- Tracking function with MSC800
- Integration into the network concept of the MSC800
- JPEG image output in real time
- 2 or 4 megapixel resolution along with a high image capture rate of up to 40 Hz
- Highly versatile customer interfaces and protocols

Your benefits

- Dynamic focus and dynamic brightness adjustment provide sharp, uniform images for different object heights, code positioning and transport speeds
- Minimum object gaps and high package throughput in the sorting process via an integrated tracking function
- Modular system design: from low-cost to high performance
- Intelligent decoding algorithms and a high image recording frequency provide excellent read rates, even with codes that are difficult to read
- Ability to combine multiple products to create a tailored hybrid solution
- Read adjacent objects with "side-by-side" focusing, which increases the throughput
- Easy installation due to the slim, sophisticated design and partial pre-assembly

Fields of application

- Multi-sided, omni-directional code reading on small and medium-sized conveyors
- Courier, express, post and cargo (CEP), retail and warehousing, tire and other industries
- Used for sorting and bag drop at the airport
- Easy upgrading of laser-based systems to optimize the read rate and reading capabilities of 2D codes
- Reading in Start-Stop operation

Focus model	Connection modules	Items supplied	Type of system	Part no.
Dynamic focus	MSC800	Lector65x (1 x- 16 x) Mounting bracket (1 x ... 16 x) MSC800 Focus device Photoelectric sensor Encoder Cables	Lector65x System Pro	On request
Flex	CDM420 / CDB650	Lector65x (1 x ... 4 x) Optics (1 x ... 4 x) Mounting bracket (1 x ... 4 x) CDB650 (1 x ... 4 x) Photoelectric sensor Cables	Lector65x System Core	On request
	MSC800	Lector65x (1 x- 16 x) Optics (1 x ... 16 x) Mounting bracket (1 x ... 16 x) MSC800 Photoelectric sensor Encoder Cables	Lector65x Sys- tem Prime	On request

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
