Description:

This serial adapter with 6ft. cable works with Windows Vista. The USB to Serial Adapter USB serial I/O product provides a single USB to RS-232 serial port for providing USB connectivity to legacy or non-USB compliant devices via a DB9 connector.

With this new ultra sleek and powerful DB-9 Serial adapter design, there will be NO OBSTACLES while connecting to older legacy serial devices.

Our new rodent has LED visual representation for receiving and transmitting of data.

This new design also features industry standard FTDI logic board for compatibility from 9600 baud all the way up to 920K!!!

Drivers are available for:
