

CA-TM-2-18FL

Turbine Flow Meter Signal Cable

Cable Details

General

The CA-TM-2-18FL is a signal cable accessory for the Ratemeter/Totalizer with NEMA4x and Explosion Proof enclosures. It consists of a 2 pin connector that will plug into industry standard magnetic pickups for turbine flow meters. It is 18" long and has two tinned wire leads intended for connections to terminals 1 & 2 on the Ratemeter/Totalizer.

The cable is long enough to permit it to be threaded through suitable mounting kit unions and plugged into flow meter pickup. The extra length is provided so it can be coiled with the instrument enclosure.
